PROJECTS

UIONOX <https://uionox.com>

- Personal software company and portfolio brand; Windows XP-style interactive desktop landing page hosting all project sites
- Motto: “Creating what deserves to exist”

Camp Supply Tracker

Private

- Web platform built for the Lebanese Red Cross Dahieh Center to coordinate camp supply donations: admins list needed items, volunteers claim quantities to bring
- Built with Flask, SQLite, and Jinja2, deployed on a low-resource VPS

Warehouse OS / IMS

Private

- Inventory management system built for internal team use, with role-based permissions, multi-warehouse stock tracking, and project-based item requests
- Built with Python, Flask, and SQLite

YouTube fixedPafy

- Active contributor to the YouTube-focused Pafy API codebase; shipped a fix for a longstanding compatibility issue

Discord Bot Developer

- Built and maintained Discord bots (ticketing, moderation, gamification, and security systems) for 30+ clients, across servers totaling ~1,500 users
